

Self Inspection

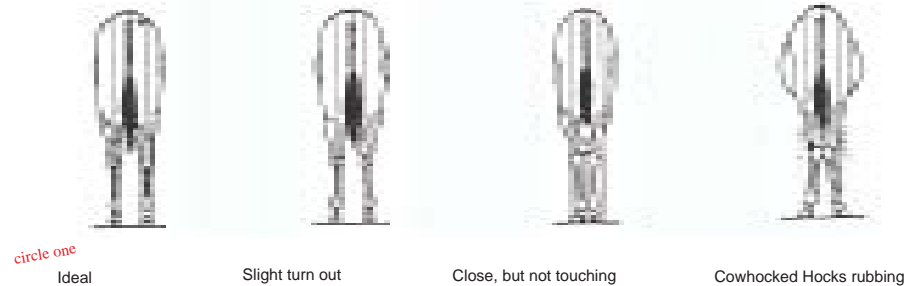

Faults for classification as Pet Quality: The areas of conformation which would make a miniature donkey eligible for either Regular or Pet Quality (non breeding stock) are as follows:

Genital defects: Adult Jacks only - Cryptorchid (having only one testicle extended and over two years of age) If this condition exists this jack should not be used for breeding and should be registered as non-breeding **Pet Quality** stock. Both testicles extended Not extended

Mouth Defects: If an overbite (top teeth extend out over the bottom teeth) or underbite (bottom teeth extend out beyond the top teeth) exists that extends in excess of 1/4" the donkey should be registered as **Pet Quality**.

Rear Leg Faults: Cow-hocked (Rear legs bent in so far that they rub at the hocks). If your donkey falls into the last category it should be registered as **Pet Quality**.

Note: If you have checked any of the boxes to the far right the donkey must be registered as Pet Quality. Of course any donkey that is obviously deformed from anything other than an accident, should also be registered as **Pet Quality**. When in question, please ask the registry.

Owner Certification:

I certify that I have checked this donkey for the above listed faults where they apply and to the best of my knowledge those faults do not exist, and if they do the donkey is being submitted for pet registration. If this is a foal being registered, I also certify that to the best of my knowledge those faults do not exist in either the Sire or Dam.

Signature(s):

Application for Registration

Follow these five easy steps to apply for registration:

1. Take pictures - If the donkey is over 24 months of age the registry needs a photo of the left side and the right side (total of 2 pictures). These photo can be regular prints or digital. These photo are placed on the back of the registration for identification purposes. These do not have to be the best of pictures, but it is important that they show a full view of each side.
2. Complete and sign the self inspection form.
3. Fill out this application form and all of the pedigree information on the reverse side if available. Pedigrees are not required for registration, but if they are known they should be indicated. When unknown put untraced.
4. Complete the owner and breeder information on this form exactly as you want it to show on all registration certificates.
5. Enclose all of the above along with credit card info and send it to the address listed above. Or visit www.web-donkeys.com and click on Donkey Registrations to pay for registrations with credit card or Pay Pal.
